

**REMARKS**

Changes on page 2 and page 8 are made so that the name of each layer in the composition of the present invention is uniform throughout the specification and claims. These changes do not represent new matter because the use of "outer" and "inner" to refer to structures 12 (upper) and 16 (bottom) of FIG. 1 can be found throughout the claims and the Detailed Description of the Invention (See pages 4-6 and 7).

The changes on pages 3, 6, 7 and 9 correct inadvertent typographical errors. As amended, the text on page 7 now correctly refers to the company, Elf Atochem.

Respectfully submitted,

*Shannon Mrksich*
